LinkedIn: <https://www.linkedin.com/in/artem-kabanov/>

Senior Front-End Engineer and Technical Lead with 6+ years of experience building SaaS platforms, marketplaces, enterprise applications, and high-traffic web solutions.

Expert in TypeScript, React, Next.js, Redux, and modern front-end architecture. Proven track record of leading development teams (2-4+ members), mentoring engineers, and delivering mission-critical projects for international clients. Strong background in performance optimization (92+ points on Google PageSpeed), scalable system design (Architected from scratch over 11 complex web solutions), cloud infrastructure (4 cloud systems), CI/CD, and full-stack development. English: Upper-Intermediate (B2).

Key Achievements

- Led React Department and coordinated Front-End development initiatives (10+ staff members).
- Delivered enterprise solutions for international clients in legal, logistics, fitness, beauty, and e-commerce, across 4+ industries.
- Built multilingual platforms serving multiple European markets (from 2 to 6+ languages).
- Designed and developed complex booking and scheduling systems (2 booking systems from scratch).
- Led migration and modernization of legacy React applications (Refactored and successfully modernized 4+ legacy applications).
- Managed relationships with VIP clients and stakeholders (3 VIP clients worked exclusively with me).

Core Competencies

Front-End Architecture (11+ projects) • SaaS Platforms (4+ projects) • Enterprise Applications (2+ projects) • Cloud Infrastructure (1 project) • Technical Leadership (3 teams, 1 department) • CI/CD (5+ projects) • System Design (1 project) • Performance Optimization (5+ projects) • Full-Stack Development (3 projects)

Technical Skills

Programming languages: JavaScript • TypeScript • C/C++ • Python

Leadership: Team Leadership • Mentoring Code Reviews • Technical Architecture • Agile Methodologies
Cross-functional Collaboration • Project Estimation • Stakeholder Management

Frontend: React • Next.js • Gatsby • Redux • MobX • Three.js

Backend: Node.js • Express.js • Nest.js • REST API • GraphQL • Django • Cotton • Alpine.js

Databases: MongoDB • PostgreSQL

UI & Styling: CSS (SASS,SCSS,LESS) • Material UI • Tailwind • Bootstrap • Any UI Libraries

Cloud & DevOps: Docker • AWS EC2 / AWS / S3 • Vercel • Heroku • CI / CD

Payment systems: Stripe • PayPal

Languages: Ukraine (native) • English (B2)

Education:

September 2004 – June 2008: ZHC ZSEA(Hydropower College), Zaporizhzhia
Faculty of Energy Specialty IOHP (installation and operation of hydropower plants).
from September 2024: Zaporizhzhia National University
Faculty of Mathematics Specialty Cybersecurity

● **EXPERIENCE**

○ **From December 2024**
Independent Software Contractor / Tech Lead

Full-Stack Web Development | Marketplaces, C2C & P2P Ecosystems

Successfully scaled an independent contracting model, establishing 2 strategic business partnerships (Fivecube, SpaceBox) and driving the end-to-end delivery of 6 high-stakes web applications, resulting in consistent 5-star client satisfaction.

Key Achievements:

- Delivered 6 commercial projects with 100% success, earning top commendations from Intrac and Water Direct.
- Acted as Tech Lead, designing scalable full-stack architecture for high-traffic Classifieds, C2C, and P2P marketplaces from scratch.
- Engineered robust frontend and backend systems using React, Next.js, Angular, Django, and Python.
- Streamlined multi-project deployment and environments by containerizing applications via Docker.

Tech stack: React, Angular, Next.js, Docker, SASS, Tailwind, Django, Python, etc.

Partners: Fivecube, SpaceBox

September 2022 - December 2024
Mettevo

○ **Front-End developer/Head of React Department**

Promoted to build and lead the Front-End Department from scratch based on high-performance delivery for 2 high-value VIP clients, expanding the team to 10 engineers and engineering a long-term pipeline of 20+ projects.

Key Achievements:

- Business Growth: Retained 2 VIP clients, securing a long-term contract for 8+ projects and generating 2 additional client referral contracts.
- Department Leadership: Built and managed a 10-person Front-end department, successfully delivering 12+ commercial projects under budget.
- Core Project Delivery: Personally led development for the marquee VIP project — Scarinci Hollenbeck (detailed in "Last projects" section), earning a personal recommendation letter from the client.
- Team Advancement: Standardized technical workflows, implemented Agile management systems, and strengthened cross-departmental alignment (5 technical documents were created).

Tech Stack: React, Redux, TypeScript, JavaScript, Next.js, WordPress, Tailwind CSS.

June 2021 – September 2022
LinkUp Studio

○ **Senior Front-End developer**

Translated stakeholder business goals into technical requirements, architecting a scalable web application that supported 2M+ active users. Led UI/UX optimization through A/B testing and user research, increasing user conversion by 15%. Established engineering standards, conducted code reviews for a team of 5+ developers, and cut code-deployment errors by 20%. Designed and engineered a complex interactive user interface entirely from scratch, reducing frontend load time by 10%.

Tech stack: TypeScript, React, Redux Toolkit, Thunk, SCSS, Docker.

July 2020 - July 2021
FaceIT

○ **Middle Full-Stack Developer/Front-End Team Lead**

Full-stack development of web applications and high-powered systems for the back-end (2000+ users), including microservices. Cleaning and structuring databases for an art gallery (600+ artists), creating a powerful dashboard for a meteorological station at the airport. Developing microservices for managing office systems (1-3+ offices). Member of the team responsible for creating the main website for the company. Leading the Front-End development team as a Team Lead (4 members). Member of the strategic team for projecting databases (5 teammates).

Tech stack: React, SCSS, styled-components, ejs, Gatsby.js, Docker, Express.js, MongoDB, PostgreSQL, GraphQL, SSR systems, Bootstrap, MUI, Prime React.

March 2020 - July 2020
DevIT

○ **Junior Full-Stack Developer**

Full-stack development of WEB applications. Creating social networks (1000-2000+ users) and a school portal for students (450 students).

Tech stack: React, Redux, Angular.js, Express.js, Nest.js, Docker, SASS, Styled-components, MUI.

LAST PROJECTS

Awenn

<https://awenn-stage.vercel.app/>

Independent Software Contractor / Front-end Tech Lead for AWENN Platform

Estimated number of users 10 thousand.

- Architected and developed a multilingual digital ecosystem utilizing Next.js (App Router), React, and Tailwind CSS to deliver an optimized user experience across European locales. For 10000+ users and for 1000+ pages.
- Engineered a highly robust on-demand cache revalidation infrastructure integrating Next.js Dynamic IO and standard WordPress CMS APIs to achieve sub-second content updates (3 levels of cache).
- Implemented complex state-driven components, including multi-step auth wizards, dynamic layouts, and global context providers managing authentication tokens and user states securely.
- Ensured strict GDPR/ePrivacy (5 rules) compliance across localized routing variations (3 languages) by embedding and configuring specialized CMP automation tools (Cookiebot).

Technologies and Ecosystem (more than 2 modern technologies):

Core Architecture: Next.js 16 (App Router, Webpack Customization), React 19, TypeScript.

State and Data Engineering: React Hook Form, Zod (Schema Validation), React Compiler (Babel optimization).

Internationalization (i18n): next-intl (Comprehensive Multi-locale Routing and Translations).

Data Visualization and Analytics: Nivo Charts.

Tech Stack: Next.js 16, Stripe SDK, Headless WordPress Content Ingestion, Sass/SCSS, React Bootstrap, Swiper, Fancybox UI, Leaflet/React Leaflet.

Intrac

<https://www.intrac.com.au/>

Independent Software Subcontractor / Front-end Tech Lead for Fivecube company

Engineered and optimized the user interface for a comprehensive SaaS management platform tailored for sports complexes, fitness centers, and class-based businesses. 25+ years old Australian sports company.

- Custom Booking Ecosystem: Developed from scratch a unique, multi-functional online booking and class scheduling system. Architected complex UI logic to seamlessly handle space reservations, class management, recurring schedules, and real-time availability updates.
- Interactive Dashboards: Built intuitive, responsive client and staff dashboards to manage attendance, track payments, and visualize financial reports/analytics.
- User Experience & Performance: Designed fluid, mobile-first workflows that simplified the sign-up and booking processes for millions of end-users, directly boosting customer conversion rates.
- **Tech Stack:** JavaScript, HTML5, Tailwind, Flowbite.

Water Direct

<https://www.water-direct.co.uk/>

Independent Software Subcontractor / Front-end Tech Lead for Fivecube company

Logistics & Operations Management Ecosystem covering 1,000+ daily points of delivery. Engineered a high-performance, modular user interface for a multi-service enterprise platform encompassing warehousing and logistics.

Key Achievements:

- Modular Architecture: Expanded a component-driven frontend architecture using Django Cotton, successfully delivering 6+ core operational modules.
- Performance Optimization: Built reactive, lightweight UI elements with Alpine.js, eliminating heavy JavaScript overhead, reducing client-side bundle size by 65%, and improving Time to Interactive (TTI) by 1.2s.
- Design System Engineering: Developed and scaled a unified, robust design system via Tailwind CSS, ensuring UI consistency and cutting future feature development time (-1h for each task for the front-end part).

Tech Stack: Python, JavaScript, Tailwind CSS, HTML5, CSS3, Django Templates, Alpine.js, Django, Cotton

Scarinci Hollenbeck

<https://scarincihollenbeck.com/>

Technical Lead / Senior Front-End developer for Mettevo company

Comprehensive digital overhaul for Scarinci Hollenbeck, a leading U.S. law firm (NY/NJ). Engineered a fast, secure, and SEO-optimized headless platform containing 6,000+ pages for complex legal services.

Key Achievements:

- UX & Conversion: Optimized user journeys and automated lead generation, seamlessly connecting clients with a directory of 70+ attorneys and 90+ practice areas.
- Headless CMS Integration: Implemented a decoupled WordPress backend via GraphQL, creating an intuitive, highly scalable content management workflow optimized for a single administrator.
- Web Performance: Boosted Google PageSpeed Core Web Vitals from a failing 38 to a high-performing 77 points, achieving near-instant mobile loading phases.
- Enterprise Security: Instituted rigid data protection, automated vulnerability patching, and compliance protocols aligned with ISO/IEC 27001 (Annex A), ISO/IEC 30111, and ISO/IEC 29147 standards across the entire decoupled infrastructure.

Tech Stack: Next.js, React, WordPress, GraphQL, Redux, Bootstrap.
